

MFOA AMP It Up Virtual Workshop

Incorporating Green Infrastructure into Asset Management Planning

Join Us!

Drawing on AMONTario's extensive experience supporting municipalities across Ontario, and expertise in green infrastructure asset management, this virtual workshop will provide practical, hands-on learning about how about to integrate green infrastructure assets into municipal asset management planning.

Through a combination of presentations and interactive exercises, participants will build a solid foundation of knowledge about green infrastructure asset management and will learn to overcome common challenges.

Topics will include:

- Incorporating GI assets into your AM hierarchy
- Defining GI levels of service
- Enterprise risk management
- Integrating condition, risk, and levels of service
- Lifecycle activities

What You'll Learn

In this virtual workshop, participating municipalities will:

- Strengthen green infrastructure asset management capabilities (in alignment with Ontario Regulation 588/17).
- Learn how to advance from early-stage asset management practices to more structured, proactive approaches that incorporate green infrastructure.
- Build skills in integrating green infrastructure into asset management state of infrastructure, levels of service, risk assessments, and lifecycle management and costs processes.
- Leave with practical tools, templates, and guidance they can apply immediately.

Asset Management Ontario (AMONTario) is a community of practice comprised of asset management practitioners who share information and best practices to advance public sector asset management and environment stewardship of publicly-owned infrastructure in Ontario.

AMONTario has worked with over 200 municipalities to deliver mentoring, coaching, and direct asset management assistance, and offers online certificate courses for practitioners relating asset management, climate change action, and sustainability.

Speakers

Jennifer Court

Executive Director, Asset Management Ontario

Jennifer is a facilitator and speaker with over 15 years' experience working with municipalities; her work on green infrastructure asset management first kindled her passion for asset management.

Michelle Sawka

Senior Advisor, Green Infrastructure Asset Management, Asset Management Ontario

Michelle is an environmental scientist who specializes in integrating green infrastructure and natural assets into environmental policy and asset management planning processes.

Participants will also have the option of a 1-hour individualized follow-up session with AMONTario staff to discuss workshop content or ask questions that are specific to their municipality.
